

*Veterinary Services' five pillars
to support your business*

2 COMPREHENSIVE TRIALS
to provide solid results thanks to
CLEAR DATA INTERPRETATION

4 DIAGNOSIS
AND TROUBLESHOOTING
supported by our laboratory
network and diagnostic expertise

1 CLOSE COLLABORATION
WITH KEY OPINION LEADERS
to deliver science & knowledge

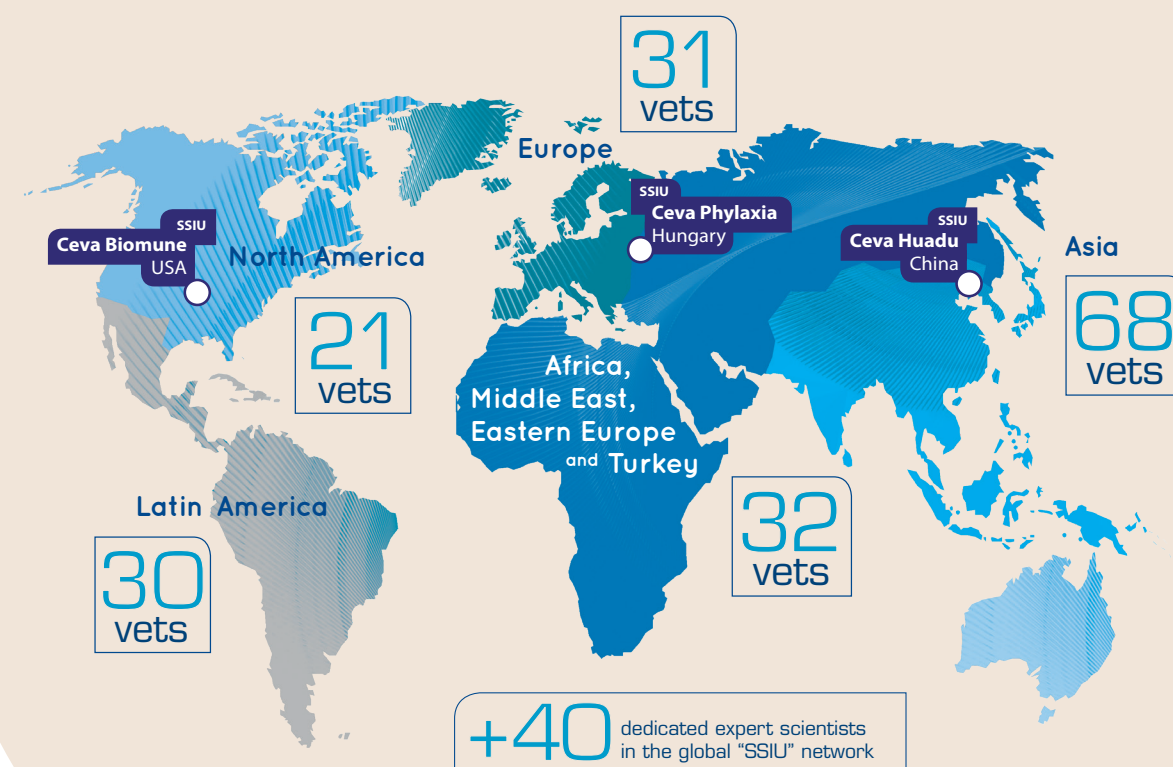

3 VALUABLE MONITORING THANKS TO
GLOBAL PROTECTION SERVICES
for proactive and data-based
decision-making

5 SHARING KNOWLEDGE
AND TRAINING customer staff
and Ceva teams through continuous
education programs

An expert network all over the world to be close to our customers in the field

With a global team of over 180 field veterinary poultry specialists who work with production managers to continually track performance of the immunization process, we ensure continuous improvement in results. These teams are centrally supported and work in a network to ensure the same level of services from one country to another.

EXCELLENCE
FOR YOUR
SUCCESS

*Providing expertise
& practical knowledge
to support your business*

THE CEVA'S VETERINARY SERVICES TEAM is a multidisciplinary group of poultry veterinarians in which each member has specific expertise in poultry health and farm management to deliver customer support around the world. Our teams are working in more than 45 countries with a network of over 100 colleagues, all with very diverse expertise and backgrounds.

OUR MISSION IS
TO MAXIMIZE YOUR PROFITABILITY
BY ACHIEVING AN OPTIMUM HEALTH
AND IMMUNE STATUS IN YOUR FLOCKS

Ceva provides innovation in all stages of the production chain:

1 CLOSE COLLABORATION WITH KEY OPINION LEADERS to deliver science & knowledge

Through our active network of knowledgeable and recognized researchers and stakeholders from both public and private organizations, our Veterinary Services are constantly exchanging with these international and local Key Opinion Leaders learning about and discussing specialized topics. This is a basic prerequisite to address issues in the field appropriately.

2 COMPREHENSIVE TRIALS to provide solid results thanks to CLEAR DATA INTERPRETATION

Field trials allow us to confirm the benefits of our vaccines under different conditions. By successfully implementing safe and efficient vaccination programs, birds can express their genetic potential for a higher performance.

3 VALUABLE MONITORING THANKS TO GLOBAL PROTECTION SERVICES

fast and regular health status and vaccine take monitoring for proactive and data-based decision-making

After reviewing the quality of the vaccination in the hatchery, birds are sent to the farms, where they will be reared up to processing age. Addressing this critical period with the proper immunization program and a clear reduction of viral shedding, together with strict biosecurity measures and good management practices, are the only methods available to reduce performance losses and protect the animals from any disease challenge.

To help you with the follow up of your vaccination program, Ceva has created A DISEASE MONITORING PROGRAM called GLOBAL PROTECTION SERVICES. G.P.S. includes regular end-point serology monitoring in vaccinated flocks TO CONFIRM THE STABLE HEALTH STATUS OVER TIME.

4 DIAGNOSIS & TROUBLESHOOTING supported by our laboratory network and diagnostic expertise

Ceva Veterinary Services are available to answer questions on any issues related to your daily activities in the field. Along with the solutions offered by Ceva, the veterinary teams are committed to taking actions and solving problems. We are active from the breeders to the processing plant, offering a wide range of activities and background within our teams.

The Ceva Veterinary Services teams are joined by different professionals with very enriching backgrounds who will carefully listen to your questions and issues. Ceva has been active worldwide in complex projects to bring solutions by looking at different angles and with the clear goal of improving our customers' profitability.

5 SHARING KNOWLEDGE & TRAINING customer staff and Ceva teams through continuous education programs

Ceva invests widely in training and education, both for its internal staff and for customer staff.

Our Veterinary Services provide regular, customized, onrequest training sessions on any topics your technical staff may need. Successful sessions have already been held in many countries. As a customer, you decide the frequency and the topics of such training sessions. Training can either be done by us, or by external experts when it is about disease management and prevention strategies.

We also hold an onboarding training program for our newcomers twice a year in order to put them on track as quickly as possible to efficiently support you. These training sessions – called Ceva University – have been running for over 20 years now.

During this time, we have trained 400 poultry professionals from various backgrounds around the world.
